

The rare **blue diamond**
collection by Bianca
Diamonds - high jewelry

Bianca
Diamonds

Blue diamonds are among the most mesmerizing and coveted gemstones in the world, prized for both their **rarity** and their extraordinary depth of color. Ranging from delicate sky-blue hues to deep, saturated tones.

Throughout history, blue diamonds have come to symbolize wealth, power, and mystery, often appearing in some of the most important jewelry collections ever assembled.

HISTORY

The origins of the blue diamond can be traced back to the Kollur mine in India's Golconda region, where some of the first famous blue diamonds were unearthed. Renowned diamonds such as the Idol's Eye (15th century) and the Hope Diamond (17th century) were among the earliest to capture the world's attention.
